

The Model AN25 industrial remote rate indicator/totalizer with an analog output is comprised of compact, convenient and precision electronics designed to interface with any frequency generating

device such as a turbine flowmeter. The AN 25 provides flow rate and totalization in most engineering units. Rate and total are displayed via an 8-digit liquid crystal display.

Model AN25 Features

Display:

8-digit LCD

Voltage Input:

115 VAC or 12 VDC input voltage

Pulse input:

30 mV AC minimum

Digital pulse output:

4-20 mA or Voltage

Engineering units:

Most engineering units are available.

Enclosure:

1/4 DIN Panel Mount or 4"x4"x3" NEMA

Dimensions
